

WebForce Photoshoot — Shotlist

1. Team Portraits — Individual (4 shots)

Appear on `/over-ons` Team spread AND the `/` testimonial slider (when restored). Aspect **4:5** portrait.

#	Person	Role	What to capture
1.1	Nigel	Bedrijfskundig advies & consultancy	Studio portrait, navy backdrop, professional but approachable. <i>Replaces</i> <code>/nigeltall1.png</code>
1.2	Zarko	Technische ontwikkeling & webperformance	Same setup. <i>Replaces</i> <code>/zarko1.png</code>
1.3	Yannick	Contentcreatie & online marketing	Same setup. <i>Replaces</i> <code>/yannick.png</code>
1.4	Akram	AI & automatisering	Same setup. <i>Replaces</i> <code>/akram.png</code>

Setup: consistent navy/dark background, same lighting on all 4, same eye-level, slightly off-center crop (face on upper-left third).

2. Team Portraits — Personality / "Hover" Shots (4 shots)

Cards reveal a second photo on hover (currently "Hobby foto volgt" placeholder). Looser, more personal/character. Same 4:5 so the crossfade reads cleanly.

#	Perso n	Idea
2.1	Nigel	Personality outside work
2.2	Zarko	"
2.3	Yannick	"
2.4	Akram	"

3. Team Group / Hero Photo

#	Use	Notes
3.1	<code>/over-ons</code> hero background + triptych "Marketing" panel	Full team, wide framing. One shot covers both spots

4. "Onze belofte" Pillar Photos — Home (4 shots, square 1:1)

#	Pillar	Mood
4.1	Snelle techniek	Zarko/Akram at screen, code visible, focused
4.2	Sterke SEO-basis	Analytics on screen, pointing at a chart, whiteboarding
4.3	Conversiegericht	UX wireframes on paper/screen, designer-thinking moment
4.4	AI & automatisering	Akram with multiple screens / automation tooling

5. Service Deep-Dive Photos — /diensten (4 shots, 4:3 horizontal)

#	Service	Idea
5.1	Website development	Two members reviewing a design on a laptop, side angle
5.2	Content & marketing	Brainstorm/content planning — sticky notes, screens with copy
5.3	Bedrijfskundig advies	Nigel in a meeting, strategy doc, whiteboard/notebook
5.4	AI & automatisering	Code/automation interface, hands on keyboard

Sections 4 and 5 can share subjects — just shoot each in both 1:1 and 4:3.

6. Triptych — /over-ons "Glimpse" Section (3 shots, 4:5 / 3:4)

#	Panel	Idea
6.1	ICT	Workspace — screens, dev environment, desk culture
6.2	Marketing	Team / camera setup / content creation in action
6.3	Consultancy	Strategy session, whiteboard, or Nigel mid-presentation

7. Case Study Photos — /cases (placeholders, 4:5 vertical)

Ideally real project deliverables, not the shoot — but Fika is the only real asset today. Capture a few generic "WebForce at work" lifestyle shots to mix in until real deliverables exist.

Summary — minimum count

Category	Count	Aspect
Team portraits (solo, work)	4	4:5
Team portraits (solo, personality)	4	4:5
Team group	1	wide
Pillar / service context	4	1:1 + 4:3
Triptych panels	3	4:5
Lifestyle filler for cases	3–5	flexible

Total: ~20 shots, ideally with multiple takes/angles each.

Want me to annotate any of these with the site's styling tokens (cyan accent, ghost-white, navy backdrop), or turn it into a printable one-pager for the shoot?
